

## Agile and effective

The TH627 is the optimum solution for lifting heights around 6 meters. It combines agile maneuverability with powerful performance and remains in a stable position even with extreme loadings.

- Exhaust emissions stage IIIB by state-of-the-art engine technology
- Diesel particulate filter optionally available
- Equipped as standard with three types of steering: all-wheel steering, front axle steering and crab steering
- Comfortable operation thanks to a load-independent flow distribution of hydraulics and an electronically controlled joystick
- Convenient bucket auto-return function for even faster operation (available as an option)
