

"NO MORE SHOVELS! SAVING YOU TIME & MONEY"

Australian manufactured

CONVEYOR BUCKETS

The Conveyor Bucket has been designed for back filling trenches, blast holes and those hard to reach places. The conveyor bucket is able to scoop raw materials such as soil, road base, mulch, poultry feed etc. There are adjustable chutes on either side of the bucket which control the outflow of material. The hydraulic flow determines the speed of the conveyor belt and the distance of the material spread. The conveyor bucket is ideal for mining and blast holes, feedlots & agriculture, landscaping, road & construction works, plumbing and council work.

THREE EASY STEPS TO FILLING A HOLE: 1 LOAD 2 CARRY 3 DISCHARGE

REPLACEABLE BOLT ON EDGE

ADJUSTABLE SIDE CHUTE

ADJUSTABLE SIDE CHUTE
