TILTING BUCKETS

Manufacturer of
Earthmoving Attachments for:

Skid Steer Loaders
Backhoes
Excavators

07 3376 3177

- The best Bucket Tilt control system available in the industry
- The Tilting 4 in 1 utilizes our industry leading 4 in 1 Bucket design with a tilting rear pickup
- The low maintenance and high strength design of the tilt control system coupled with a simple 12 volt solenoid operation puts this 4 in 1 light years ahead of the pack
- This gives the operator full radial control of the cutting angle
- The unique design means it is possible to continuously vary the cutting edge relative to the inclination of the loaders front wheels
- This is particularly useful when working on an incline whilst trying to perform a straight cut
